YOUR CARE, CONNECTED

From concern to care.

A patient portal that turns a clear request into a practical next step.

DESCRIBE | FIND CARE | BOOK

Care routing, chat and waiting times. Powered by Mubit.

A SIMPLER FIRST STEP

Asking for care should not be the hard part.

Patients describe the concern. Wellby brings the next steps together.

01

Describe it once

A guided request captures symptoms, duration and impact in everyday language.

02

Find the right service

Care options are explained clearly, with the reason for the suggested pathway.

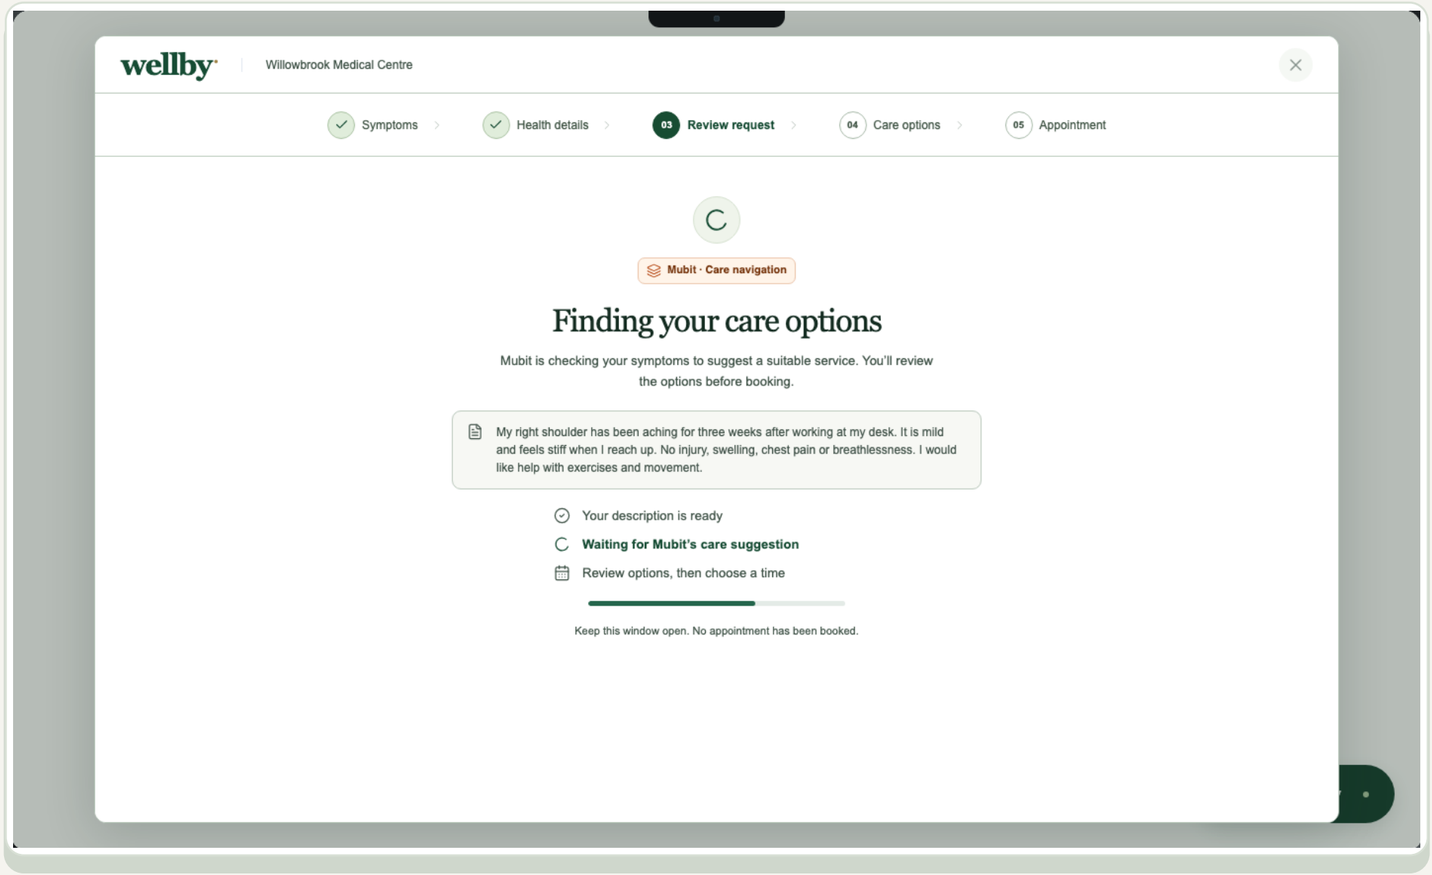

03

Keep it connected

Choose an appointment, review visit details and ask for help in the same portal.

CARE ROUTING / POWERED BY MUBIT

Finding your care options

01

In your own words

Maya explains shoulder pain and the effect on everyday movement.

02

Powered by Mubit

Mubit suggests care options from your reviewed symptoms.

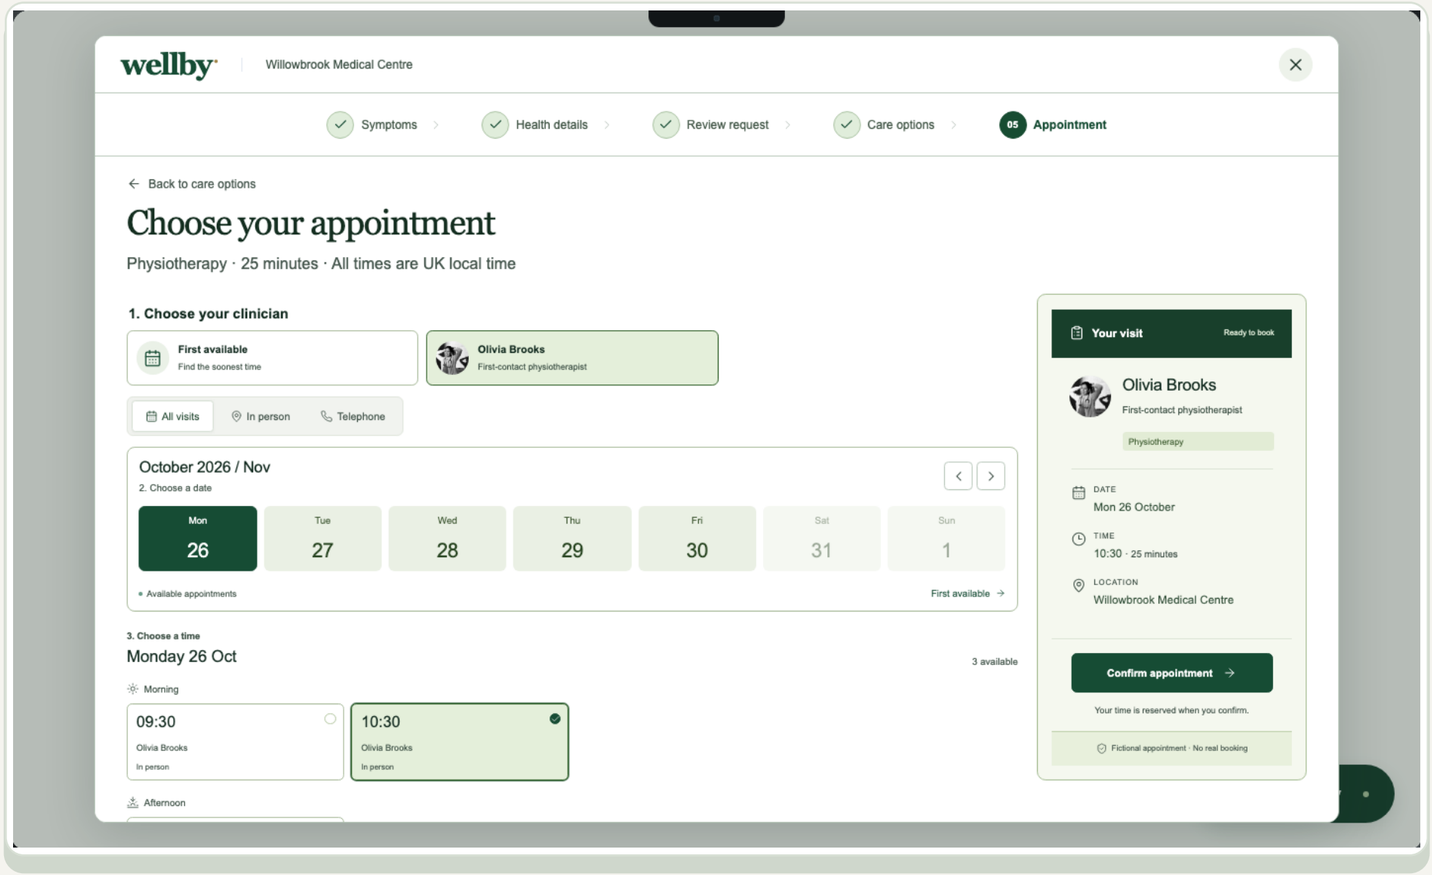

03

An explained pathway

Physiotherapy is suggested, with relevant alternatives and a next step.

APPOINTMENTS

Choose the visit. Confirm the details.

01

Choose your clinician

View the available care team, dates and appointment times.

02

Book with clarity

Check the visit, location and duration before confirming.

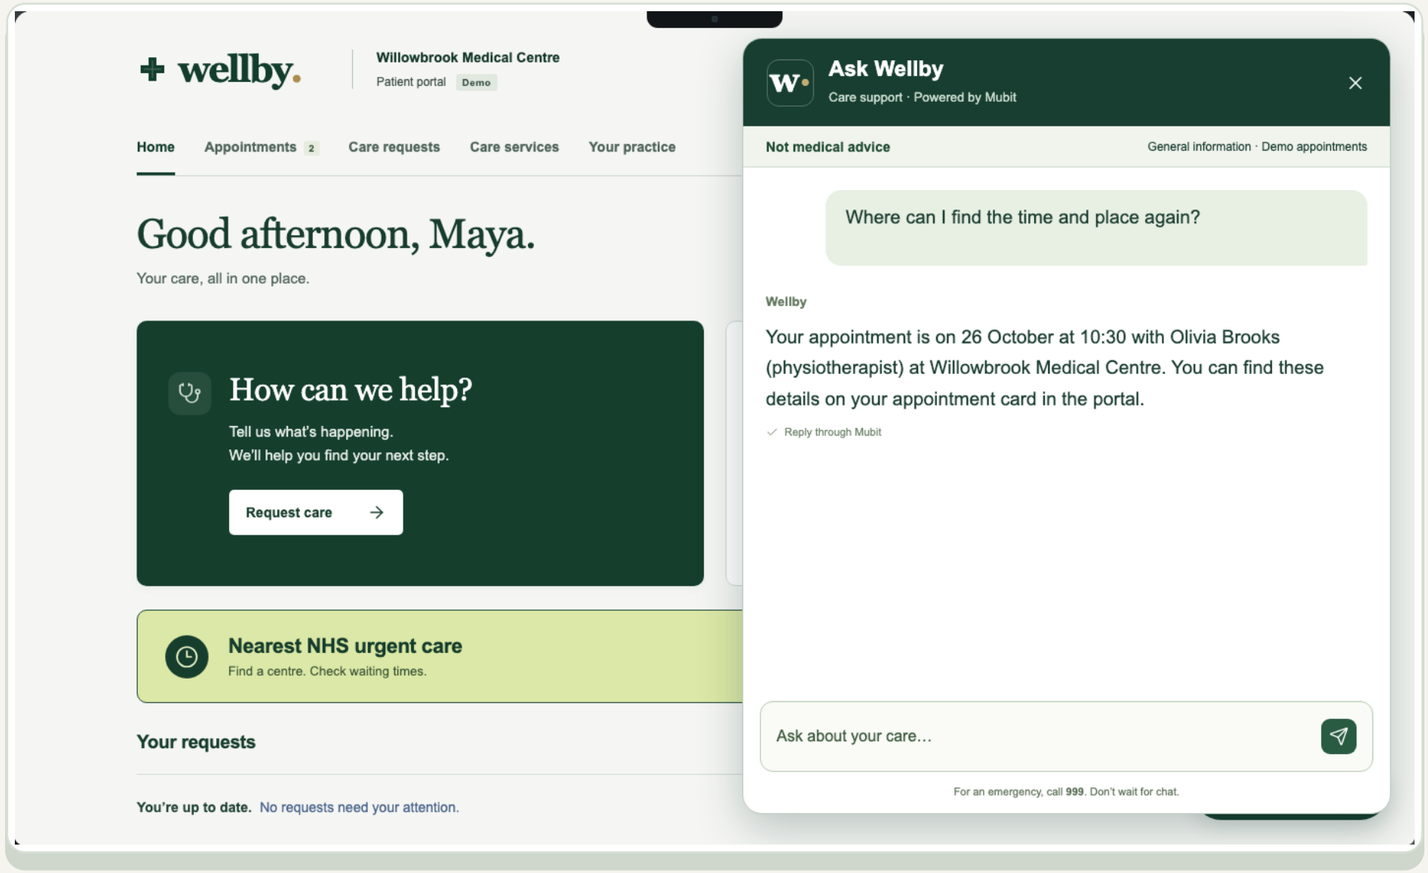

03

Everything stays together

Your request and appointment remain connected in the portal.

ASK WELLBY / POWERED BY MUBIT

Help alongside your care journey

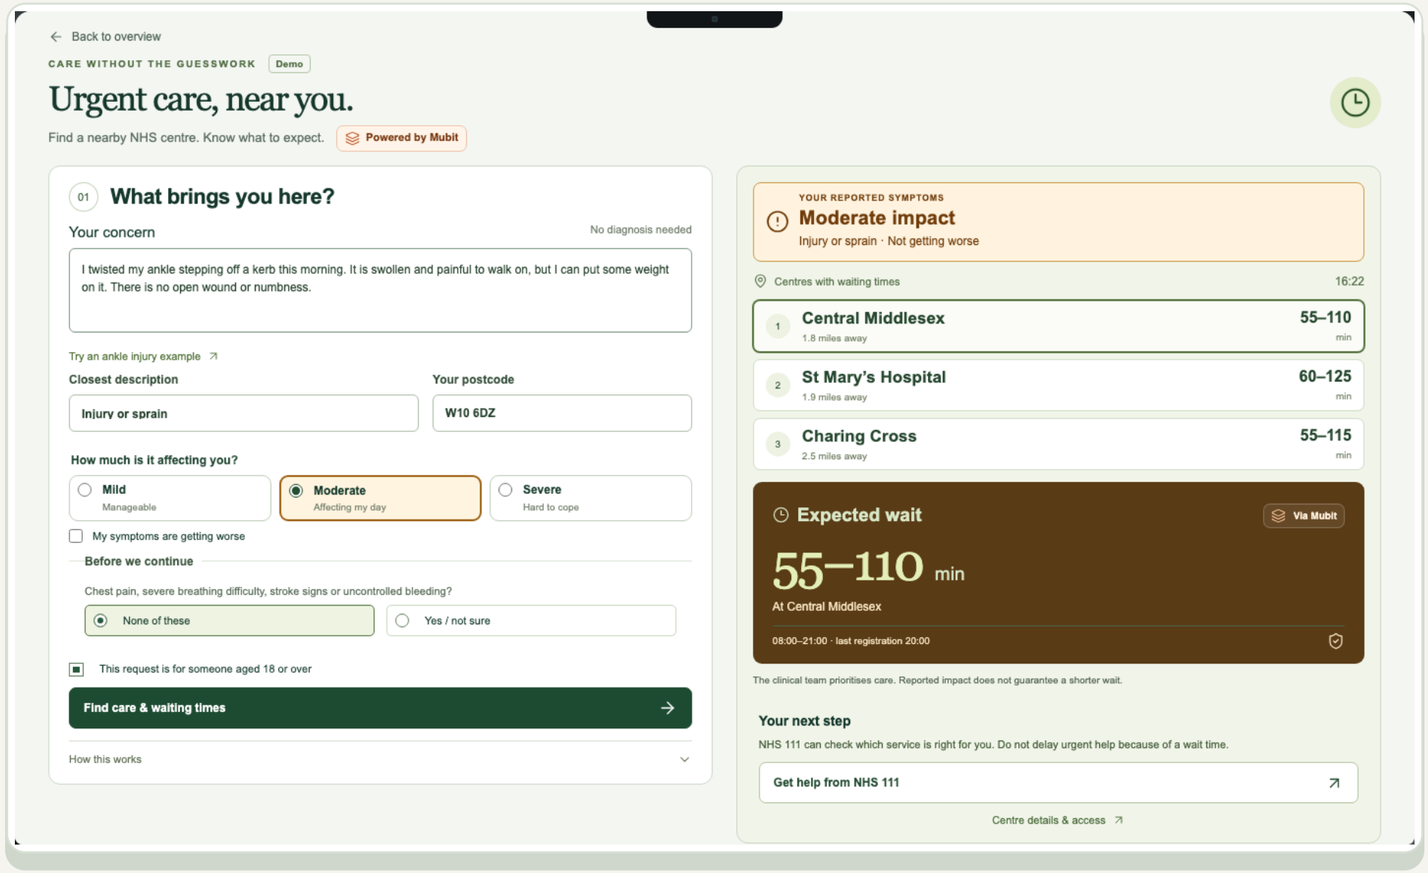

A conversation, powered by Mubit

Ask general questions, check appointment details, or prepare a care request with Mubit.

The conversation stays alongside your portal, so you keep your place.

URGENT WAITING TIMES / POWERED BY MUBIT

Nearby NHS care and waiting times

01

Describe the urgent concern

A short safety check comes before waiting-time results.

02

Mubit-powered forecasts

Mubit uses past visits and arrival details to forecast waits.

03

Impact stays visible

See nearby centres. Severe or worsening symptoms switch to urgent advice.

BUILT WITH MUBIT

Three actions, powered by Mubit

One connected portal. Mubit handles the AI calls behind each experience.

01

Care routing

Structured symptoms become suggested care options, ready for the patient to review.

02

Ask Wellby chat

Conversational help for general questions, portal guidance and care requests.

03

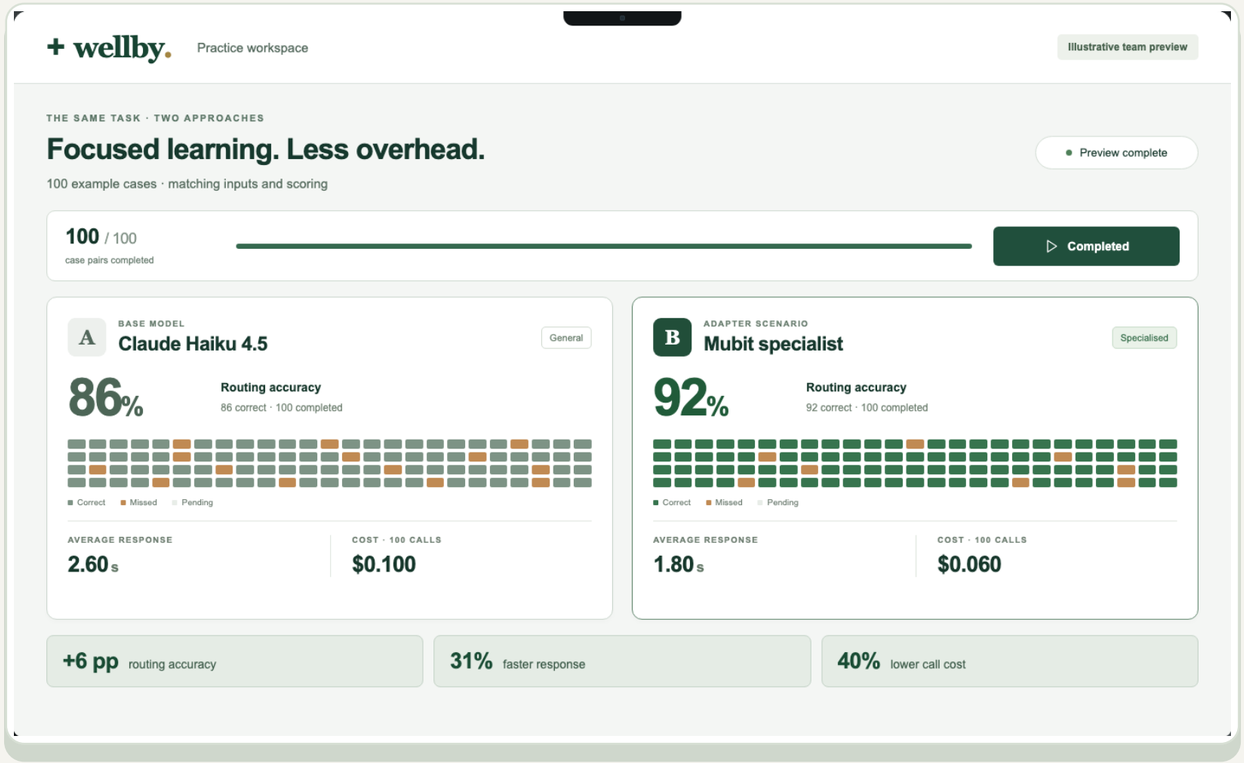

Urgent waiting times

Arrival details and past visits inform forecasts for nearby supported centres.

Separate learning tasks for navigation and waiting times. Responses pass through Mubit auto-routing.

TEAM-PREVIEW COMPARISON

Compare the same task side by side

Same inputs. Two routes.

Direct Haiku and Mubit receive the same care-navigation cases.

Accuracy, time and cost

Follow the test count as it increases. Compare routing accuracy, response time and call cost.

Illustrative team-preview values, matching the video. These figures are not measured results or evidence of current adapter performance.

CARE, CONNECTED

Less back and forth. A clearer next step.

For patients: one place to ask for help.

For practices: a clearer first request.

For care: a connected journey.
